

Consultant Full-Time, Risk Consulting

Working at KPMG allows you to gain valuable on-the-job experience while building your professional network and business acumen. Being part of a KPMG Global member firm of 153 countries and over 207,000 professionals, you'll be part of a high performing team and have access to ongoing professional development and mentorship at every level. You will work with national and global organizations, and be involved in client delivery, firm building activities, and community initiatives. At KPMG, we'll provide you with the support to drive your own career and discover the countless opportunities available.

We are seeking talented and energetic candidates to join our Advisory team as a Consultant, working in our [Risk Consulting](#) practice in **Victoria for fall 2021**. Typical candidates may have a degree/diploma in areas such as business, finance, economics, computing science, technology, information systems, or cyber security and are interested in pursuing one or more of the specialist professional designations we support (e.g. CISA, CISSP, CIA, PMP, CIPP, CFE, CFA, CPA).

Positions are available in the following Risk Consulting service lines:

Technology Risk Consulting (TRC)

- Information technology audits: examining and assessing systems and technology risks and controls including general technology and control environments, and automated processes and controls embedded in information systems to support KPMG audit or advisory engagements.
- Attestation reporting on business systems and controls (including automated and manual processes as well as IT general controls at cloud and software service providers, fin-tech services, business processing and data centres) in accordance with industry standards.
- Information systems and controls assurance: determining whether robust controls for major IT systems and their implementation and configuration are in place and operating effectively, and identifying and recommending improvements.
- System implementation and conversion project advisory: evaluating and advising on system implementation planning, configuration, testing and data conversion issues, and on related IT project risks and controls.
- Information reliability and resilience: assuring stakeholders of information and systems reliability through IT governance, risk assessment, cyber security, personal information and privacy protection, business continuity and disaster recovery planning, IT controls benchmarking, and IT due diligence.
- Assisting with understanding, risk assessment, issues identification, and developing and executing auditing and assurance strategies with respect to emerging technologies such as cloud and mobile computing, cryptocurrency, blockchain, and artificial intelligence

To apply:

All applications must be received no later than **Monday, August 31st by 11:59PM PST.**

Our online application system will allow you to include up to five documents without losing your formatting. Applications can be addressed to **Hiring Manager** and should include:

- Cover letter
- Resume
- Electronic copy of your most recent transcript and/or GPA

If you do not have access to an electronic copy of your transcript, we ask that you attach a screenshot of your grades from your school's website.

Key considerations as you apply:

- Please note that you are limited to one application during the summer / fall recruitment period.
- In the application questionnaire, you'll be able to indicate your preference for first and second office locations.
- Please clearly choose the relevant Advisory service line in Risk Consulting that is currently hiring (i.e. TRC or IARCS)

If you experience any difficulties, please contact ca-fmadvisoryrecruitment@kpmg.ca
